

FERTINNOWA

Reduction of environmental impact of fertigated crops

Els Berckmoes
PSKW

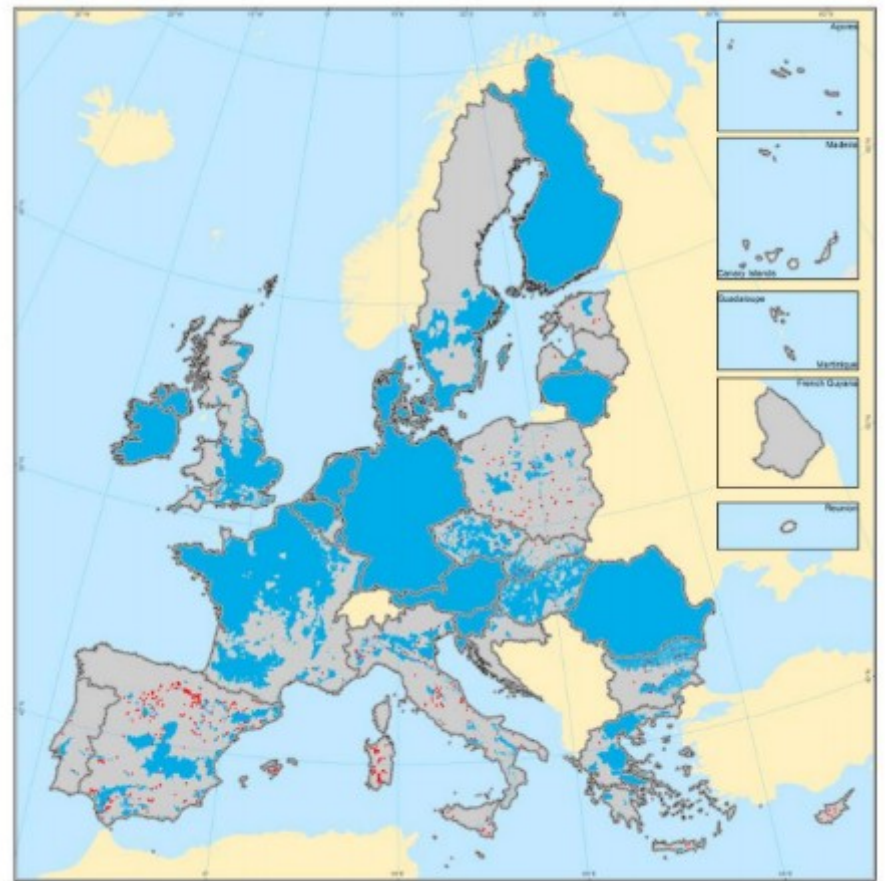

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 689687

Ground water nitrate concentrations & nitrate vulnarable zones (EU-28)

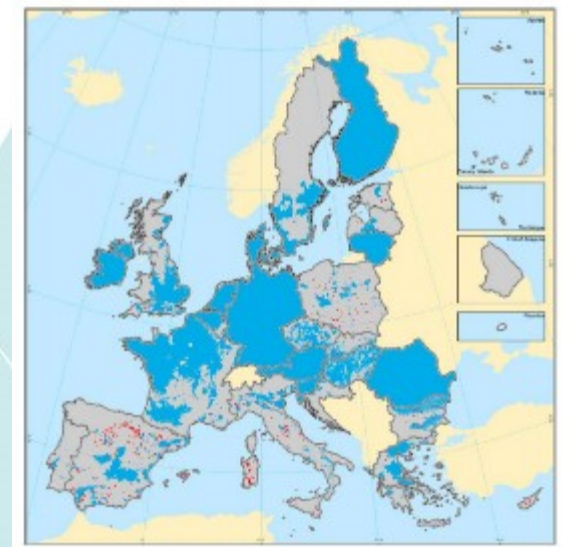

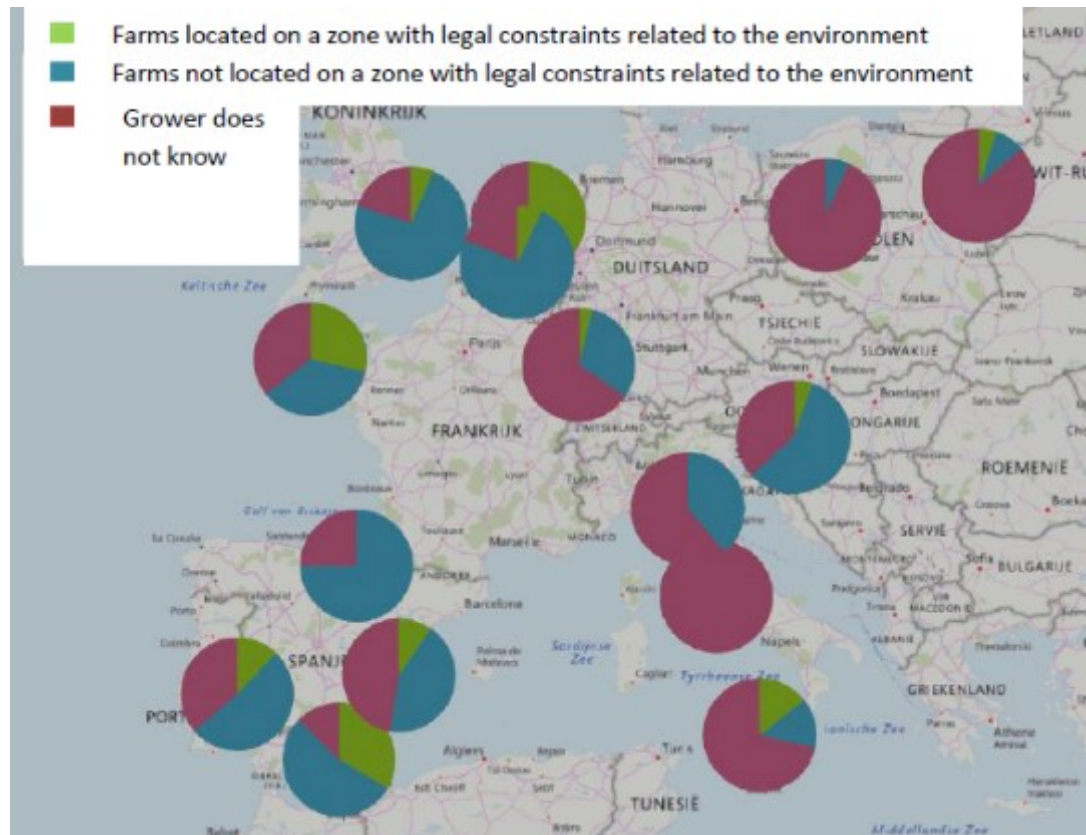

Reporting period 2012-2015

- Nitrate vulnarable zone
- Ground water ≥ 50 mgNO₃/l outside NVZ

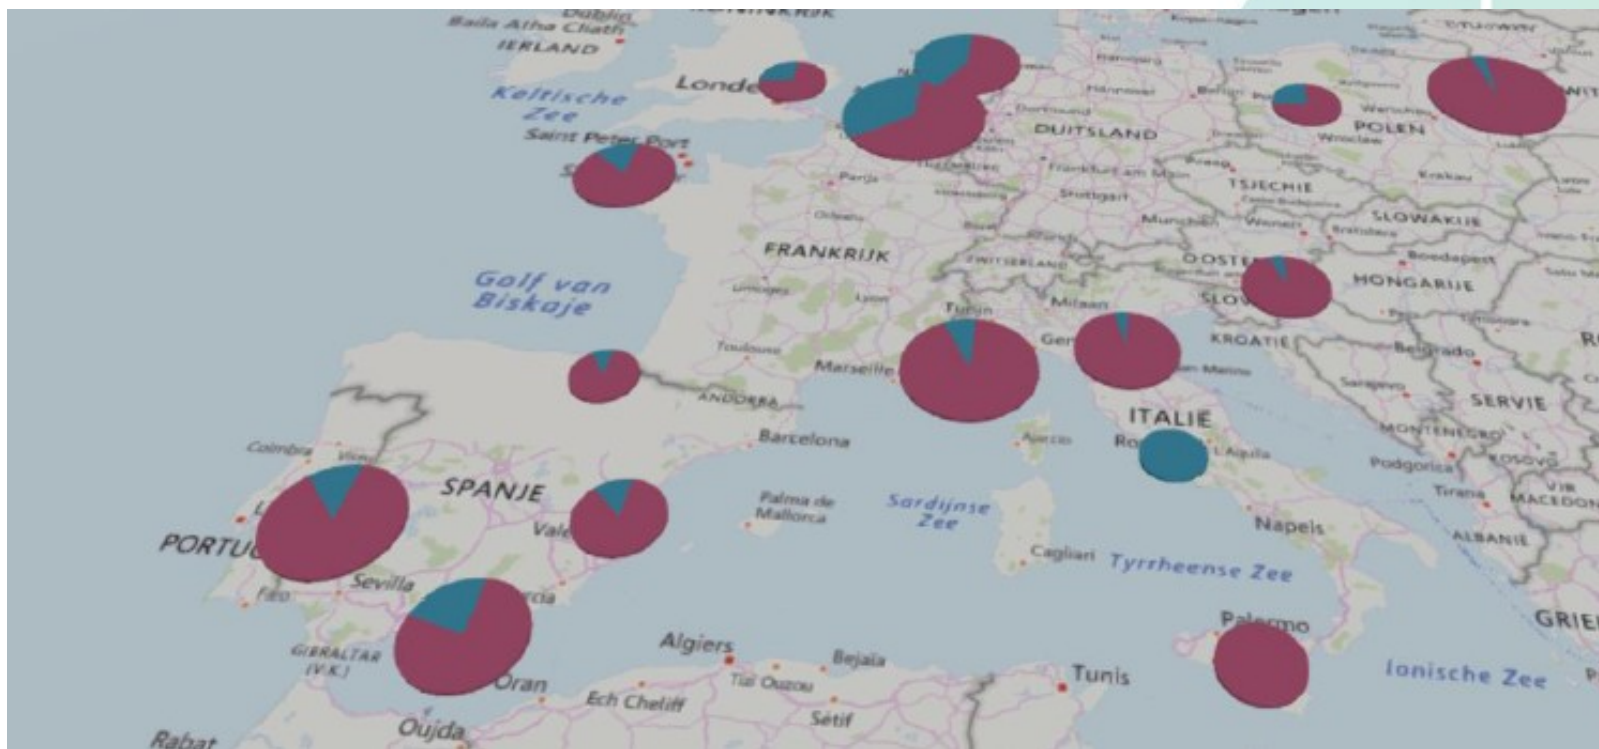

Source: DG ENV, Member States reports on Nitrates Directive implemetation

Interviewees' awareness of nitrate vulnerable zones

Interviewees willing to invest to minimise environmental impact

Interviewees willing to invest within the next 3 years (2016-2019)

Interviewees **NOT** willing to invest within the next 3 years (2016-2019)
